

Privacy Policy for DocuBot

Last Updated 13.11.2024

Overview

DocuBot is a privacy-focused macOS application that assists users in querying and navigating project documentation with the help of AI models running locally on their device. Your privacy is our top priority. DocuBot is designed to operate entirely offline, ensuring that your data remains secure and private.

Data Collection and Usage

DocuBot does not collect, store, or transmit any personal data. All operations, including AI processing and document analysis, are performed locally on your device. This means that your queries, project files, and other data stay on your Mac and are never shared with us or any third parties.

Key Privacy Practices

1. **No Network Connections:** DocuBot operates entirely offline. It does not make any network requests, ensuring that no data is transmitted from your device. The one exception to this is when offering to download a default model, when no models are present.
2. **Local AI Processing:** All AI computations are performed locally on your Mac. DocuBot uses on-device models, so there's no need for cloud processing, which enhances privacy and security.
3. **No Tracking or Analytics:** DocuBot does not include any form of tracking, analytics, or logging.
4. **We don't monitor how you use the app,** and we don't collect any usage data.
5. **Open Source Transparency:** DocuBot is fully open source, allowing users to inspect the code and verify its privacy practices. This transparency provides assurance that there are no hidden data collection mechanisms.

Third-Party Services

DocuBot does not use any third-party services for analytics, tracking, or data processing. All functionality is self-contained within the app and operates solely on your device.

Data Security

Since DocuBot does not transmit any data, there is no risk of unauthorised access or interception of your information. All your data remains under your control, stored only on your Mac.

User Consent

By using DocuBot, you acknowledge that no personal or project-related data will be collected or transmitted. Your use of DocuBot is entirely private and secure, and you have complete control over any files and information processed by the application.

Changes to This Privacy Policy

Although we do not foresee making changes to this privacy policy, any updates will be posted within the application and on our official website. Since DocuBot does not collect any user information, there is no need to notify individual users of changes to this policy.

Contact Us

If you have any questions or concerns about this privacy policy or DocuBot's privacy practices, please feel free to contact us at:
